

## Programmer

### Honolulu, HI

The Baldwin Group, Inc. ([TBG](#)) seeks a talented Programmer to join our software development team who has a background in developing web-based applications using JavaScript and related technologies. This position will support our contract with the NOAA Pacific Services Center ([PSC](#)) in Honolulu, HI.

A part of the NOAA National Ocean Service, PSC, CSC and OCRM support the environmental, social, and economic well-being of the coast by linking people, information, and technology, to the issues facing our Nation's coast. PSC and CSC work with various partners in all levels of government, education, and the general public to bring information, services, and technology to the nation's coastal resource managers.

The position is part of the Application and Data Services Program. This dynamic team includes web designers, database administrators, and application developers who work with project teams to deliver inventive solutions that support the needs of the nation's coastal resource managers. Projects cover topics like historical hurricane tracks, tsunami awareness, ocean energy planning, geospatial data access catalogs, and more.

#### Duties

- Interact with project teams to understand requirements and translate them into innovative solutions
- Design and develop tools, analytical techniques, and processes to enhance the business needs of the organization
- Participate as a member of a technical team that proactively plans the implementation of enterprise systems across a wide platform of technologies.

#### Qualifications

- Minimum 5 years of experience building software and extensions for tool development
- Solid programming skills and experience developing stand alone and web-based applications and tools
- Experience in the following areas highly desirable:
  - HTML5, JavaScript, CSS
  - Experience with the JavaScript libraries: JQuery, JQuery UI, Bootstrap.js, and Angular.js are preferred
  - Mobile and/or responsive application development
- Experience building geospatial applications preferred
- Good communication skills
- Organization and attention to detail
