Coastal Zone Management Act (CZMA) Federal Consistency Training

May 2019

Office for Coastal Management
National Oceanic and Atmospheric Administration

_____

The Office for Coastal Management provides training to federal and state agencies on the implementation of and compliance with the CZMA federal consistency provision. This includes regional Federal Consistency training, training sessions at regional state coastal management meetings, and individual training as requested by a federal agency or state agency. Our federal consistency training provides an understanding of the CZMA federal consistency provision and a forum for states and federal agencies to learn about each others' programs, coastal management issues and concerns, and federal consistency procedures. Our training are a key assistance activity provided by the Office for Coastal Management. Over the years states and federal agencies have noted how useful the training is and continue to request additional training opportunities.

When future federal consistency trainings are planned this document and our webpage will be updated: http://www.coast.noaa.gov/czm/consistency/applying/
