

Appendix A – Comprehensive List of Original Performance Measures

In 2014, the Office for Coastal Management began an effort to streamline the Coastal Zone Management Act Performance Measurement System (CZMAPMS). The first step in this effort was to work with state coastal management programs to identify a subset of measures that states would no longer be required to report on beginning with the 2015 reporting cycle. The goal for streamlining measures was to reduce the reporting burden on state coastal management programs while maintaining a performance measurement system that demonstrates the national impact of state coastal management programs and informs program management decisions at the national level. The list below was retained as a reference of the original comprehensive list of Performance Measures, including showing measures in strikethrough that were removed during the 2014/2015 streamlining process.
