Process Agenda Development
MEETING ENGAGEMENT TOOL

Description
Develop a detailed plan for meeting execution.

Process
Process agendas should include the following information:

- Overall goal of the meeting, and any desired outputs.
- Objectives for each session.
- Who will speak, and run each session.
- The process that will be used to accomplish each objective.
- Supplies that will be needed to perform the process (e.g., easel pads, markers, Post-it notes, dots)
- Timing and the estimated duration for each step in the process

Steps:
1. Determine the meeting goal and outputs.
2. Develop a list of objectives to reach the meeting goal.
3. Establish one session in the meeting for each objective.
4. Determine what tool or technique will be used to meet the objective.
5. Detail the activities for the session.
6. Estimate the time to complete each activity.
7. Determine if there is enough time to accomplish all the activities in each session and adjust accordingly.
8. Fill in supplies needed and determine who will lead each session.
Benefits

- Provides a plan to keep the meeting on track and reach objectives.
- If the leader is absent for any reason, the meeting can be led by anyone with the process agenda.
- The planning team knows what will be accomplished and is happier with the meeting results.
- Creating an agenda forces the leader to think through how to approach the meeting in advance.

Considerations

- A process agenda takes a lot of time to develop.
- An agenda is difficult to develop with a group.
