

CRAFTING THE CLIMATE TALK: A NEW CARD GAME TO TEACH PROFESSIONALS EFFECTIVE  
CLIMATE AND SEA LEVEL RISE RISK COMMUNICATION TECHNIQUES.

*Sarah Watson, Bloustein School for Planning and Public Policy, Rutgers University*

Community officials all hear similar types of questions from their constituents regarding flood and sea level rise risks. However, officials often struggle with crafting and delivering appropriate and effective responses. We are developing a card game to help local officials learn how to effectively respond to these challenging questions. Come test our draft and help us improve this new game.
